

G202

Debris Management

Course Description

This three-day course will provide an overview of issues and recommended actions necessary to plan for, respond to, and recover from a major debris-generating event with emphasis on State, Tribal, and local responsibilities. Developed from a pre-disaster planning perspective, the course includes topics such as debris staff organizations, compliance with laws and regulations, contracting procedures, debris management site selection, volume reduction methods, recycling, special debris situations, and supplementary assistance.

Course Objectives

- Apply knowledge of planning for, implementing and managing debris activities, Including issues associated with:
 - environmental and historic preservation considerations
 - debris forecasting and estimating
 - debris contracting

- debris management site evaluation and operations
- debris monitoring
- supplemental assistance
- Apply knowledge of FEMA eligibility and reasonable cost criteria as pertinent to Presidentially declared events.
- Address debris planning and response and recovery activity issues in a Debris Management Plan Development Aid.

Course Length

- 24 hours

Prerequisite

- None

Target Audience/Discipline

- Emergency Management Directors and staff
- Public works (including waste management staff)
